

FAQ's

Q. Is treatment painful?

A. The BTX treatment is rarely painful, with most patients feeling a slight discomfort if at all. We will walk you through the procedure before we start and answer any questions you may have.

Q. I'm worried that I'll end up with a "Trout Pout"?

A. Every patient gets an extensive assessment and a conversation about outcomes occurs before any treatment. We will aim to meet your expectations being mindful not to over-contour the lips.

Q. Can I go back to work after having the procedure?

A. With BTX injections at worst you'll have a little redness which will subside after a few hours. Following Dermal Filler/Mesotherapy injections of the mouth area or nose to mouth area you may experience temporary mild bruising and swelling so in fact you may decide not to return to work that day.

Q. What are the other usages of Mesotherapy?

A. Along with rejuvenating the face, mesotherapy can be used to tighten loose skin, lighten pigmented skin and also treat alopecia, a condition that causes hair loss.

*'I've always been made to feel comfortable with my treatments'
-Mrs M T*

*'It was pain-free and been really really pleased with the results'
-Beverley*

*'The service from Vishal and his nurse is very good'
-Mrs Smith*

Anti-Wrinkle
Treatment

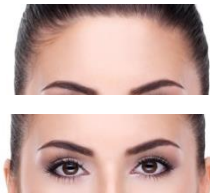

Painless non-surgical facial treatments

As we get older, nature can sometimes need a helping hand and that's where non surgical facial treatments can work wonders.

You deserve to look and feel at your very best and we're here to help you achieve that in a virtually pain-free manner.

Botox

Botox is a natural and effective way to look younger to smooth out those tell tale lines and wrinkles.

To smooth forehead wrinkles/ 'frown lines' we use Azzalure which contains a purified protein called Botulinum Toxin.

Wrinkle softening is a quick and painless procedure so you can even visit us during your lunch hour! We use a very fine needle to inject Botulinum Toxin into areas where required. It usually takes around 7-14 days to see the full effects of each treatment with results lasting up to 4 months.

At Confidential we can help you reach your desired results, painlessly using the very latest products and techniques.

Fillers

Juvéderm® fillers are natural fillers that are injected directly into the skin to improve overall skin quality, by adding moisture back where it is needed. They also add volume, to either restore volume lost over time, or to provide a subtle enhancement, leaving you feeling confident.

Dermal Fillers can be used for fuller lips, soften nose to mouth lines and crowsfeet for a more youthful look. It can enhance the shape and possibly the fullness of your lips and can soften the creases around your mouth corners to look instantly rejuvenated.

Around the mouth Fillers Before and After

Lip Fillers Before and After

Following application of local anaesthetic in this region we can safely and painlessly inject a special "gel like" product in the lip borders, lip body and the mouth creases as appropriate. The effects can last from 6-12 months depending on the product being injected.

Hydration

PRGF®-Endoret® ensures a high level of skin hydration compared to levels obtained with other cosmetic treatments as it has been proven in clinical trials.

Wrinkle reduction

The filler effect got through the use of PRGF®-Endoret® technology attenuates the wrinkles in the infiltrated areas. The facial expression lines lose their depth similar to the way they do on the treatments with hyaluronic acid.

Skin luminosity

PRGF®-Endoret® makes skin recover the lost luminosity over the years. Patients that have gone through this innovative treatment achieve a higher luster of their skin.

Mesotherapy

The Mesotherapy PRGF facial uses extracts of your own blood to provide growth factors that can rejuvenate the skin as well as stimulating growth of fresh cells. Bti Endoret allows us to use the highest concentration of platelets which contain the growth factors that revitalise your skin.

Quickly and painlessly, using the meso-injector, multiple tiny injections of these growth factors are then injected into your area of choice for smoother, plumper, younger-looking skin. This procedure is extremely safe and the product is completely natural and taken from your own body so there is no chance of an allergic reaction. It is recommended to repeat treatment for optimal results.
